FTI-MAP1: Vehicle Coverage and Preparation Notes

F	RSTECH, LLC. SUPPORT - 1(888) 820-3690, EXT. 203
"	SUPPORT - 1(888) 820-3690, EXT. 203

Make	Model	Year	Install	CAN	Lights	Clutch 1	Clutch 2	I/O Changes	
DL-MA3 Mazda	CX-3 PTS Hatchback AT	2016-22	Type 1	SSU	Park / Auto Type 2	N/A		Green White/Blue N/A	

Firmware:

This installation requires **BLADE-AL(DL)-MA3** firmware, flash module and update controller before beginning the installation.

WARNING: Disconnect vehicle battery before disconnecting any of the connectors at the START/STOP Unit. Failure to do so may result in damage to the vehicle keyless receiver (PN: KD33 675D4, X1T65171), resulting in required replacement.

Optional hazard light connection for remote start status and diagnostics:

The MAP1 harness is provisioned to utilize the vehicle hazard lights for status and diagnostic display if desired. The pin terminated *green/white* wire needs to be inserted into any POC available in the controller's I/O connector, and the selected POC setting changed to either **Hazard1**, POC option #30 (momentary), **or Hazard2**, POC option #23 (latching), depending on how the factory switch engages.

Parking light connection: The vehicle headlight switch must be removed to access parking light connections which are detailed on the next page, and in a video published in the FirsTechFeed Group on Facebook. Scan the QR Code below to view the video.

FTI-MAP1 Clutch wiring: The FTI-MAP1 harness is pre-wired for clutch bypass handling. When used in M/T applications, with a compatible CM7/X series controller, the necessary wires for both clutch types have been provided, pre terminated, and ready to be installed in the gray CM I/O connector. This installation type does not require making these connections. Please insulate and secure the unused wires (**red/black**, **yellow**, **and purple/black**).

FTI-MAP1: Installation and Configuration Notes

- A DISCONNECT BATTERY BEFORE PROCEEDING
- B OPTIONAL CONNECTION (IF NOT USING STANDARD PARKING LIGHT CONNECTION)
- C NOT REQUIRED
- REQUIRED CONNECTION (IF NOT USING PROVIDED HAZARD LIGHT CONNECTION)
- E SWITCH REMOVAL/DISASSEMBLY REQUIRED
