DL-NI8 Infiniti	QX50 PTS AT	2019-21	Type 2	BCM	Park / Auto POC 1	DSD	Hazard 1/2	Green White/Blue

NI8 Type 2 install requires **BLADE-AL(DL)-NI8**, flash module and update the controller firmware before installing.

CAN: CAN data is acquired from the BCM using the green harness cable.

POC1: Visual status confirmations and diagnostic information are provided by hazard light connections in the harness assembly, POC1 must be configured for either **Hazard1** (POC option #30 (momentary switch) **or** **Hazard2** (POC option #23 (latching switch)).

Type 2 Door Locks: Connect female white 2-pin door lock connector to male black 2-pin (B) BCM jumper.

CM Unlock Configuration: Proper unlock control requires configuring the controller disarm output to double-pulse unlock. Set feature option 1-4 to setting 2 (Double Pulse).

Vehicle Damage Warning:

Caution should be taken to avoid mixing up the BCM connectors, vehicle damage will result if the connectors are positioned improperly. It is advised that you make the BCM connections one at a time, confirming that each T-harness connection is at the correct BCM position before proceeding to the next connection, attempting to program, or attempting to remote start.
