FTI-CDK1: Vehicle Coverage and Preparation Notes

F	RSTECH, LLC. SUPPORT - 1(888) 820-3690, EXT. 203
l l	SUPPORT - 1(888) 820-3690, EXT. 203

Make	Model	Year	Install	CAN	Lights	RAP	Trunk	I/O Changes
DL-CH5 Chrysler	300/300C	2005-07	Type 1	SKREEM	Park / Auto A	D		Green White/Blue

Firmware:

Covered vehicle uses BLADE-AL(DL)-CH5 firmware, flash module and update the controller firmware before installing.

Warning:

SKREEM damage may result from excess pressure placed upon the SKREEM connector and harness during disassembly. Fully exposing the SKREEM so that the connector release can be fully depressed will help avoid damaging the module.

This install requires START and MUX connections provided in harness assembly

Lights:

Type A (MUX) parking light connections are located at the 10-pin headlight switch, an additional relay and 1K Ohm resistor are required to complete the circuit interface.

Rap:

Type D (-) retained accessory power (RAP) handling requires connecting the controller rearm output to the driver's door pin wire, *purple* in the driver kick panel harness.

Start: Green/white pk light connection not required, connect red/white park light input to +12V and insulate the unused green/white.

Attention: The red/white +12V connection is REQUIRED for successful operation and must be made.

Harness modification required for vehicles that require MUX/START connections.

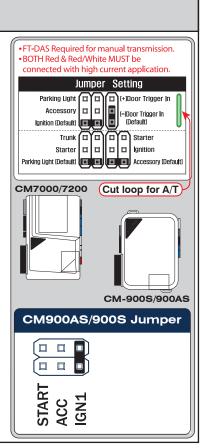

Cut and insulate the violet wire in pin #1 of the male SKREEM connector, as illustrated.

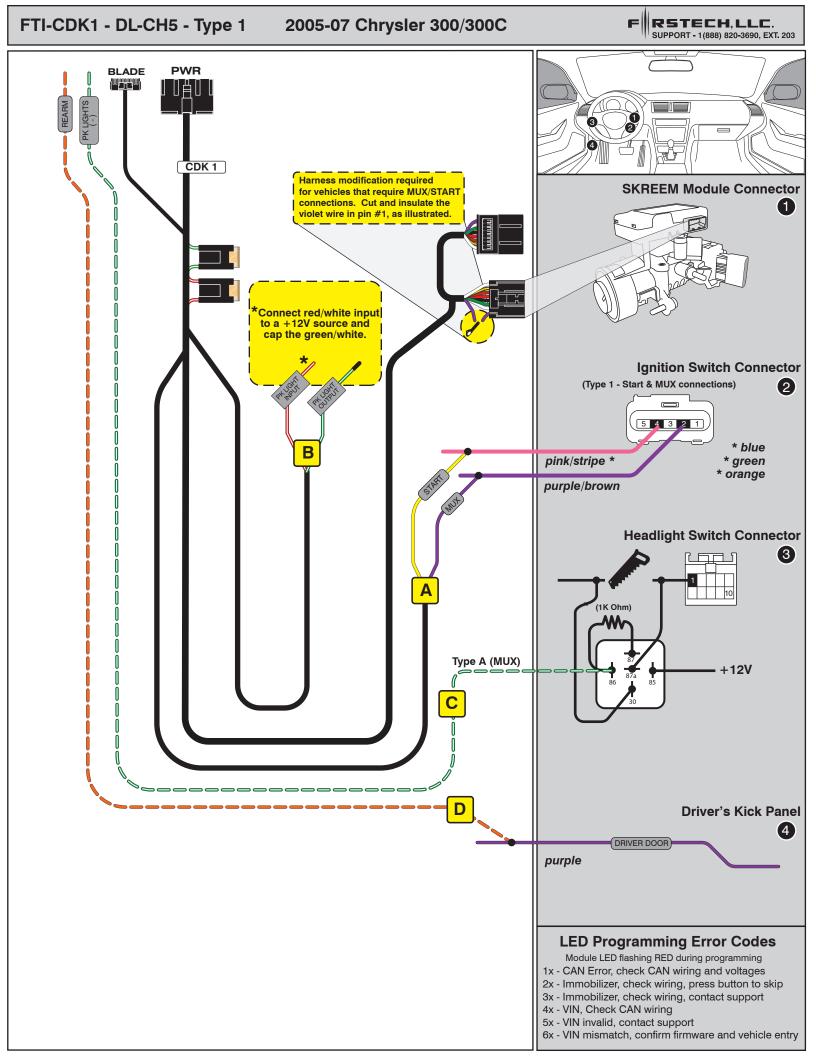

FTI-CDK1 - Installation and Configuration Notes

- +12V START and MUX connections.
- \blacksquare Green/white not used, connect red/white to +12V constant.
- MUX parking lights require an additional relay and 1K Ohm resistor.
- PAP shutdown connection, configure POC RAP (option #3).
