FTI-CDP1: Vehicle Coverage and Preparation Notes

| Make | Model | Year | Install | CAN | Lights | IGN | Hood |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| DL-CH7 <br> RAM | 1500 PTS Diesel | 2018 | Type 4 Changes |  |  |  |  |

Firmware: Covered vehicles use either BLADE-AL(DL)-CH7, confirm application, flash module, and update the controller firmware before installing.

Install: Type 4 vehicles use the included CAN extension cable to source CAN data from the green CAN junction block (left side of the dash) or from the BCM (pin\#25, CANH, brown, pin \#26, CANL, yellow).

Lighting: Type B parking lights use the 10-pin connector, secure unused 6-pin connector for safety.
Ignition: Common ignition provisions are listed in the BLADE diagram, ignition is also available at the vehicle BCM (connector C5/E, pin \#27, pink/white).

Hood: Hood status wire is available at the vehicle BCM, connector C1, pin \#11 (violet/blue).

## FTI-CDP1 - Installation and Configuration Notes

A
Required CAN connections.
B Not Required.
C] Hood pin connection.
D Ignition jumper, NO CONNECTION required.
E Ignition connection.
