DL-FM8 Ford	F-150 PTS AT	2020	Type 2	GTWY	**Park / Auto** A	**Required**	N/A	**Green White/Blue** N/A

Firmware: This installation requires **BLADE-AL(DL)-FM8** firmware, flash module and update the controller firmware before beginning the installation. This firmware requires the use of tach monitoring, please ensure that tach is programmed to avoid malfunction.

Confirm vehicle compatibility on the module flashing site before proceeding with installation.

See compatibility note below.

2020-21 model year compatibility requirements: This installation requires that the vehicle be equipped with an active and functioning OEM remote starter, in order for the firmware to function properly. Without an OEM remote starter to control, this firmware is incapable of controlling the vehicle and the installation will require a fully hardwired key surrender solution.

Compatibility requirements: In order to confirm firmware compatibility, please confirm vehicle is equipped with active hood pin switch. Hood ajar warning must be displayed in instrument cluster when hood is open and ignition is on. Additional dealer programming and switch installation or hood ajar circuit manipulation* is required if hood ajar warning is not displayed when confirming.
