Parking Light (Default)

(-)Door Trigger In

Cut loop for A/T

(Default)

 BOTH Red & Red/White MUST be connected with high current application. Jumper Setting

Accessory

CM7000/7200

Firmware: This installation uses BLADE-AL(DL)-GM12, flash module and update the controller firmware before installing.

Install: Type 1 installation sources CAN data from the blue connector of the BCM, requiring the use of the 'A-connector, the connector marked 'B' is not used.

Lights: Type A lights (standard parking lights) are provided, as are Type H (hazard lights), both incorporated in the harness for visual display of runtime status/diagnostics. Re-pinning of the CM I/O (gray) harness is required, regardless of which type you choose to use, both options have been provided for your selection. If you choose hazards you will also need to configure the selected POC for one of the following hazard control options, Hazard1 (POC option #30 (momentary) or Hazard2 (POC option #23 (latching), depending on hazard switch operation.

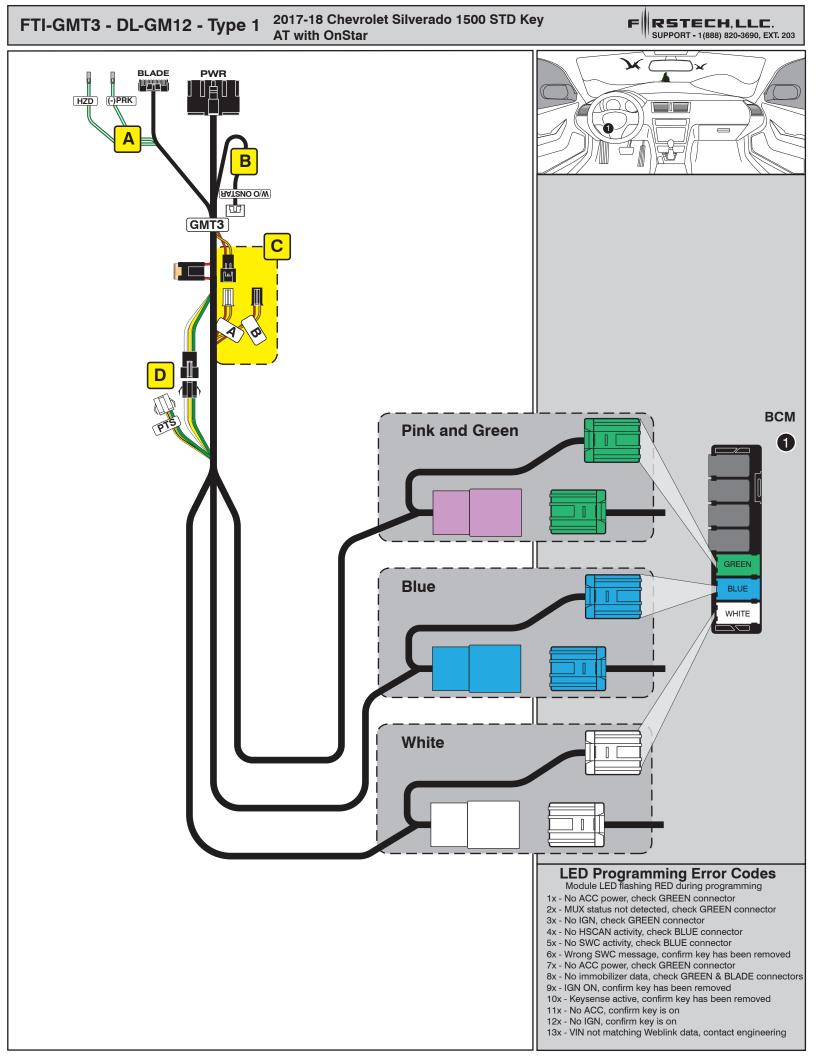

Locks: The CM lock connector is not required for this installation type. Door locks are handled via OnStar data signals so analog connections are not necessary. Secure the harness connector as needed.

Lock connector is NOT REQUIRED for this installation type. :)

FTI-GMT3 - Installation and Configuration Notes

- Α REQUIRED CONNECTION, SEE NOTE ABOVE
- В CONNECTION NOT REQUIRED
- **REQUIRED CONFIGURATION TYPE A**
- D **REQUIRED CONFIGURATION - KEY TYPE**
