

Make	Model	Year	Install	CAN	Lights	Locks	Brake	I/O Changes
DL-HA2 Honda	Civic Hybrid STD Key AT	2006-11	Type 1	N/A	Park / Auto gray/org	DATA	lt.green	Green White/Blue N/A

This installation requires **BLADE-AL(DL)-HA2** firmware, flash module and update the controller firmware, before beginning the installation.

**Lights:** Parking light & Light off connections are located at the headlight switch connectors. Additional wiring from the CM I/O connector is required, providing a negative parking light wire, and a status wire to provide lighting and light off control. You are required to select the appropriate POCs and configuration accordingly.

**Parking Light:** **Gray** (pin #8, 12-pin connector) at headlight switch harness.  
**Light Off:** **Orange** (pin #10, 12-pin connector) at headlight switch harness.

**Brake:** Brake status is not provided over data, additional wiring is required to properly monitor brake status. The vehicle brake wire (**lt.green**) is at the 2-pin brake switch connector, located at the top of the brake pedal assembly.

**Door Locks:** Door locks are covered via data, no additional connections required.

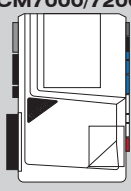

## FTI-HDK1: Installation and Configuration Notes

- A** CUT REQUIRED
- B** NOT REQUIRED
- C** REQUIRED CONNECTION
- D** REQUIRED CONNECTIONS
- E** NOT REQUIRED

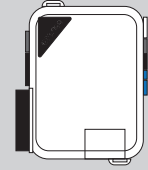

- FT-DAS Required for manual transmission.
- BOTH Red & Red/White MUST be connected with high current application.

**Jumper Setting**

Parking Light	(+)-Door Trigger In	
Accessory	(-)-Door Trigger In	
Ignition (Default)		
Trunk	Starter	
Starter	Ignition	
Parking Light (Default)	Accessory (Default)

**LED Programming Error Codes**

Module LED flashing RED during programming

- 1x - No SWC (doorlock) activity, check orange wire connection
- 2x - IMMO error, check connection and harness configuration (jumpers)
- 3x - Generic error, come on... it's a T-harness :)

## CARTRIDGE INSTALLATION

1 Slide cartridge into unit. Notice button under LED.

2

Ready for Module Programming Procedure.

## MODULE PROGRAMMING PROCEDURE

1 Insert key into ignition.

2 Turn key to ON position.

3

3 Wait, LED will turn solid BLUE for 2 seconds.

4

4 Turn key to OFF position.

5

5 Module Programming Procedure completed.
