FTI-NSK1: Vehicle Coverage and Preparation Notes CM7 Series Guide F										
Make	Model	Year	Install	ВСМ	Lights	Locks	POC 1	I/O Changes		
<b>DL-NI4</b> Nissan	Altima STD Key AT w/OEM Alarm	2005-06	Type 2	DKP	Park / Auto NI-LOCK*	Туре А	Hazard1/2	Green White/Blue START2		
Intstall <b>Type 2</b> requires <b>BLADE-AL(DL)-NI4</b> , flash module and update the controller firmware before beginning the installation. I/O <b>Changes:</b> Each vehicle in this installation group have different configuration requirements for proper handling of ACC and START circuit handling. Please ensure that the appropriate changes have been made before testing. <i>The required changes are listed below.</i> <b>CM7000/7200 I/O Changes:</b> <b>START2:</b> Move CM jumper 3 to Starter, connect CN1 GREEN/WHITE wire to yellow 2nd START wire at configuration point <b>[C]</b> <b>Optional Hazard Light Control:</b> <b>NI-LOCK</b> harness <i>green/white</i> is pre-wired for hazards, connect harness wire to the controller POC1 ( <i>blue/white</i> ), additional configuration required. Vehicles equipped with a MOMENTARY activation switch require that POC1 be configured for Hazard light (POC option #30), if the switch is LATCHING type you will use <b>Hazard light 2</b> (POC option #23).										
D         NI-LOCK harness configuration: Configure Double Pulse Unlock (feature 1-04, option 2) Door locks are analog via the white 6-pin connector. Type A lock configuration is also required, connect white 2-pin female housing to black 2-pin plug [A].         NI-LOCK* vehicles require additional wiring and a relay to open the auto-light shutdown loop provided on the NI-LOCK harness.         FTI-NSK1: Installation and Configuration Notes
