Make	Model	Year	Install	BCM	Lights	Locks	POC 1	I/O Changes
DL-NI4 Nissan	Pathfinder STD Key AT	2005-12	Type 1	RSC	**Park / Auto** NI-LOCK*	DATA	Hazard1/2	**Green White/Blue** START2/ACC

Installation **Type 1** requires **BLADE-AL(DL)-NI4**, flash module and update the controller firmware before beginning the installation.

I/O Changes: Each vehicle in this installation group have different configuration requirements for proper handling of ACC and START circuit handling. Please ensure that the appropriate changes have been made before testing. *The required, controller specific, changes are listed below.*

CMX I/O Changes:

START2: Set **HCP #1**, feature option **S-#4-1** (Default (+)Parking Light) to **Option 2 (2nd START)**, connect *green*/*white* to *yellow* (2nd START) at harness configuration point **[C]**

ACC: Set **HCP #3**, feature option **S-#4-3** (Default (+)Ignition) to **Option 4 (2nd ACC)**, connect **CN1** *blue* wire to *blue* (2nd ACC) at configuration point **[C]**

Optional Hazard Light Control:
NI-LOCK harness *green*/*white* is pre-wired for hazards, connect harness wire to the controller POC1 (*blue*/*white*), additional configuration required. Vehicles equipped with a MOMENTARY activation switch require that POC1 be configured for **Hazard light** (POC option #30), if the switch is LATCHING type you will use **Hazard light 2** (POC option #23).

Auto-Light OFF:
NI-LOCK harness *orange* is pre-wired for Auto-light shut off, if the vehicle is equipped with auto-lights connect CM REARM output (*orange*) to *orange* wire in harness.

D

NI-LOCK harness configuration: Configure Double Pulse Unlock **(feature 1-04, option 2)** Vehicle lock functions are handled through data, additional harness configuration is not required.

NI-LOCK* vehicles require additional wiring and a relay to open the auto-light shutdown loop provided on the NI-LOCK harness.

FTI-NSK1: Installation and Configuration Notes

A CUTS REQUIRED - INSULATE AFTER CUTTING

B REQUIRED CONNECTION - USE JUMPER IF NO IMMOBILIZER

C CONNECT AS ILLUSTRATED

D CONNECT AS ILLUSTRATED

E CONNECT AS ILLUSTRATED

• FT-DAS Required for manual transmission.
• BOTH Red & Red/White MUST be connected with high current application.

Jumper Setting

Parking Light / Accessory / Ignition (Default) — (+)Door Trigger In / (-)Door Trigger In (Default)

Trunk / Starter / Parking Light (Default) — Starter / Ignition / Accessory (Default)

LED Programming Error Codes
Module LED flashing RED during programming

1x - No HSCAN activity, OBD-II connector
2x - No immobilizer data, check connectors
3x - N/A
4x - No IGN, check circuit power and connections
5x - Immobilizer data error, check connections and ground
6x - VIN error, confirm vehicle matches Weblink input

Doc. No.:   ##75307##   20210414

CARTRIDGE INSTALLATION
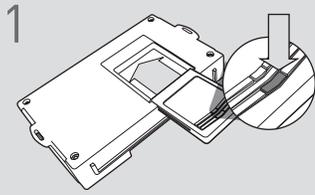

1 Slide cartridge into unit. Notice button under LED.

2 Ready for Module Programming Procedure.
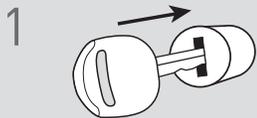

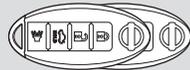

MODULE PROGRAMMING PROCEDURE

NOTE

I   To complete this procedure, use one regular key or one valet key.

OR

II   When programming, all key fobs must be located at least 10 feet away from the vehicle.
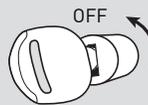

1 Insert key into ignition.

2 Turn key to ON position.

ON

3 Wait, LED will turn solid BLUE for 2 seconds.

4 OFF   Turn key to OFF position.

5 Module Programming Procedure completed.
