FTI-NSP2: Vehicle Coverage and Preparation Notes

F RSTECH, LLC.

		1 SUPPORT - 1(868) 820-3090, EXT. 20						
Make	Model	Year	Install	CAN	Lights	ВСМ	POC	I/O Changes
DL-NI3 Infiniti	QX60 Intelli-Key PTS AT	2014-20	Type 1	Туре А	Park / Auto POC 1 Hazard1/2	BIC	See note	Green White/Blue None/ACC

Install Type 1 requires BLADE-AL(DL)-NI3 firmware, flash module and update the controller firmware before installing.

CAN: The NSP2 harness, when configured for NI3 applications, does not require a specific configuration of the harness CAN connector, the NI3 CAN connections are hardwired between the *white* 14-pin connector and the Black 40-pin BCM connector.

Lights: Visual status confirmations and diagnostic information are provided via hazard lights when using the NSP2 harness. The controller **POC1** output must be configured for one of the following settings (depending on switch type):

- * Hazard light [30] momentary hazard switch
- * Hazard light 2 [23] latching hazard switch

POC Configuration:

CM7/CMX: POC2 - 2nd START [2] POC3 - 2nd IGN [3]

CM9: POC3 - (-) START POC4 - (-) IGNITION

I/O Changes: Type 1 requires configuring the CN1 blue wire for ACC output, controller specific settings are listed on the next page.

Vehicle Damage Warning:

Caution should be taken to avoid mixing up the BCM connectors, vehicle damage will result if the connectors are positioned improperly. It is advised that you make the BCM connections one at a time, confirming that each T-harness connection is at the correct BCM position before proceeding to the next connection, attempting to program, or attempting to remote start.

CARTRIDGE INSTALLATION

Doc. No.: ##75297## 20210412

Slide cartridge into unit. Notice button under LED.

2

3

Ready for Module Programming Procedure.

MODULE PROGRAMMING PROCEDURE

Push start button twice [2x] to ON position.

Wait, LED will turn solid BLUE for 2 seconds.

Module Programming

Push start button once [1x] to

Procedure completed.

OFF position.
