FTI-TLP2: Vehicle Coverage and Preparation Notes

MAKE	MODEL	YEAR	INSTALL	PTS	LIGHTS	STARTER	DCM	I/O CHANGES	
DL-TL7 Toyota	Highlander Hybrid PTS AT	2020-21	Type 4	Optional	Park / Auto Type 2	Hybrid 5	1	Green White/Blue n/a	

This installation requires **BLADE-AL(DL)-TL7** firmware, flash module and update controller before beginning the installation.

Install Type 4: Main Body ECU (driver side kick panel), steering lock connector, starter connection and DCM cut are required.

- Page 2: The starter wire (yellow) connects to the purple starter wire (pin #4, black 54-pin connector) at the hybrid ECU, located behind the glove box, harness white/red & white/black are used to interrupt the DCM power at pin #5 of the gray 53-pin junction block, located in the driver's kick panel.
- Page 3: Insert the provided green/white wire into the CN1, position #6, connect to the purple starter wire (pin #4, black 54-pin connector) at the hybrid ECU, located behind the glove box, harness white/red and white/black are used to interrupt the DCM power at pin #5 of the gray 53-pin junction block, located in the driver's kick panel.

Lights: Parking lights are handled using the pre-terminated **green/white** wire bundled with the BLADE connector, Autolight control requires an additional relay and wiring. Remove the (-) pk light wire from the controller's gray I/O connector and replace with the one specified, for status and diagnostic reporting. Connect relay and wiring to the headlight switch connector [B] as illustrated.

Locks: This installation type requires additional connections to the vehicle door locks to ensure proper synchronization with the OEM remotes. *The 6-pin lock connector is required for correct operation.* Connect to the control module lock output port.

Blue/Yellow (PTS): The PTS wire (blue/yellow) is optional. If Idle Mode is not desired, trim as necessary, then insulate and secure.

Idle Mode is not a supported feature of the FTI-TLP2 Harness: The Idle Mode feature which allows the user to exit a running has been excluded from the FTI-TLP2 harness wiring. If this feature is desired, please refer to the full BLADE installation diagram for the applicable wiring and make the required connection to the vehicle PTS button.

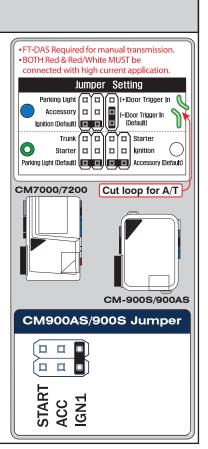

TAKEOVER NOT SUPPORTED: THE VEHICLE WILL SHUT DOWN UPON OPENING DRIVER'S DOOR

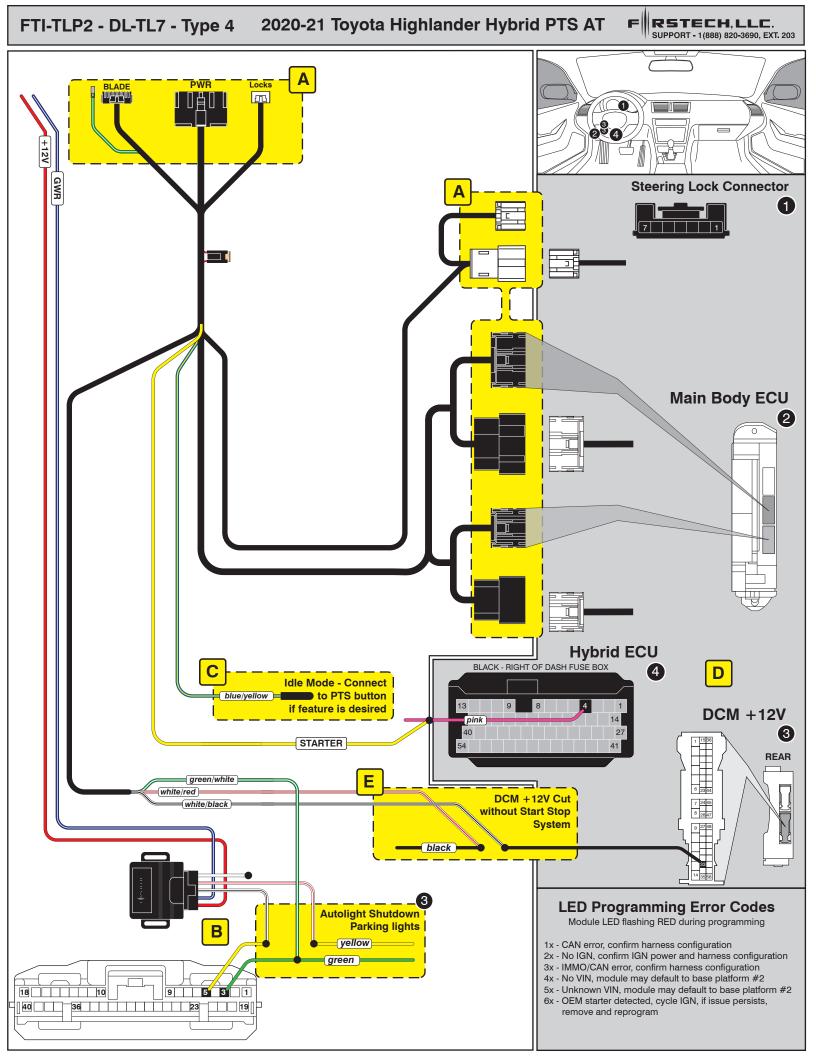

FTI-TLP2: Installation and Configuration Notes

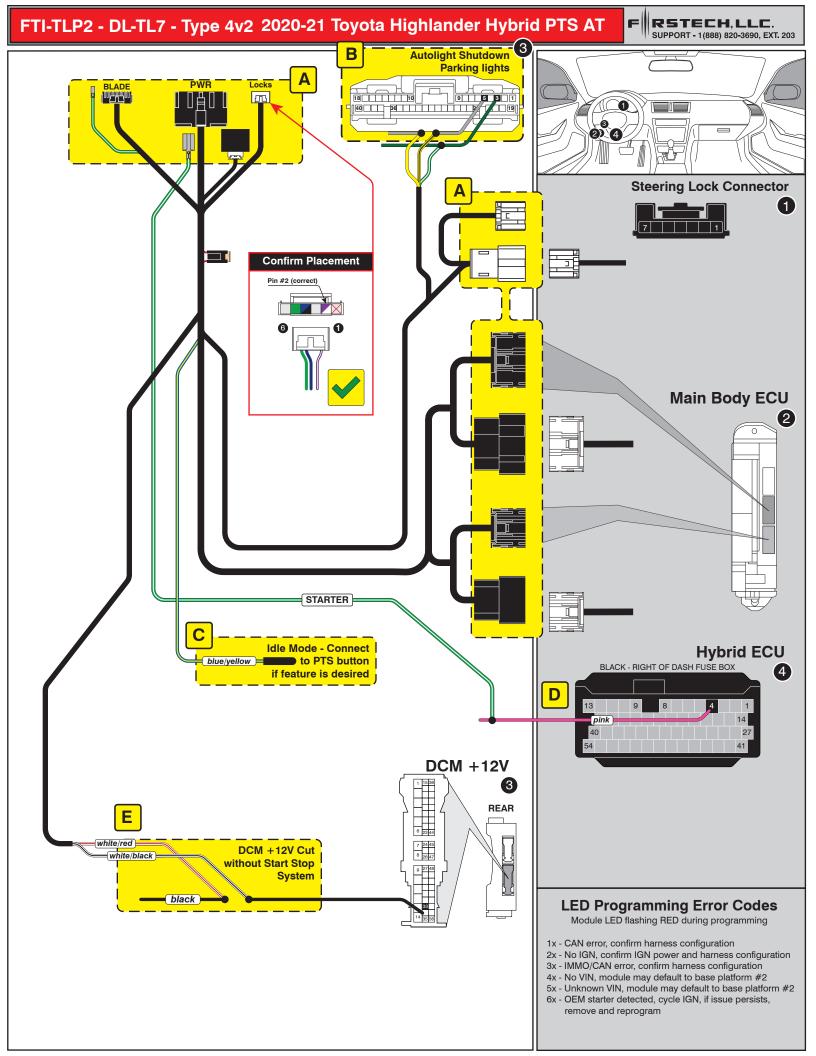

- A CONNECTIONS REQUIRED
- **B** CONNECTIONS REQUIRED
- C CONNECTION OPTIONAL
- D CONNECTION REQUIRED
- E CONNECTION REQUIRED

CARTRIDGE INSTALLATION

Slide cartridge into unit. Notice button under LED.

2

Ready for Module Programming Procedure.

MODULE PROGRAMMING PROCEDURE

NOTE

I IMPORTANT: The hood must be closed.

Push start button twice [2x] to ON position.

2

Wait, if LED turns solid BLUE for 2 seconds, proceed to step 7.

If LED flashes BLUE rapidly, proceed to step 3.

Push start button once [1x] to OFF position.

Wait, LED will turn solid RED. (This may take up to 5 minutes.)

5 ENGINE START STOP X2

Push start button twice [2x] to ON position.

6

Wait, LED will turn solid BLUE for 2 seconds.

Push start button once [1x] to OFF position.

8

Module Programming Procedure completed.
