FTI-FDK1: Vehicle Coverage and Preparation Notes

F	RSTECH, LLC. SUPPORT - 1(888) 820-3690, EXT. 203
11	SUPPORT - 1(888) 820-3690, EXT. 203

Make	Model	Year Install		CAN	Lights	Trunk/ Liftgate	IGN	I/O Changes	
DL-FM3 Ford	Transit 80 bit Key	2015-19	Type 11	OBD-II	Park / Auto	N/A		Green White/Blue N/A	

Firmware: This installation requires **BLADE-AL(DL)-FM3**, flash module and update the controller firmware before installing. Be advised that most trim levels of the Transit do not have an active immobilizer system, please confirm whether vehicle is equipped before installation.

Controller Configuration: Set feature 1-11 to option 2 (Ignition pulse - same timing as disarm pulse) for proper handling of OEM alarm.

Installation: If the vehicle is equipped with an immobilizer, the **type 11 install** requires cutting the FM3 TX loop, located near the harness BLADE connector. Cut loop before programming to vehicle.

Locks: Type A door lock connections are at the BCM, **brown** 67-pin connector, Lock: (*gray/yellow*, pin #25), Unlock: (*violet/gray*, pin #56).

Parking lights: The Transit has four (4) independent light circuits to connect, they are as follows:

Front Rear - brown/yellow, pin #66 of brown 76-pin connector at BCM

Right Rear - white/orange, pin #67 of brown 76-pin connector at BCM

Front Left - green/orange, pin #14 of brown 46-pin connector at BCM

Rear Left - violet/green, pin #15 of brown 46-pin connector at BCM

Immobilizer: Confirm before the installation whether or not the vehicle is with an active immobilizer system. If the vehicle is not equipped, connect immobilizer delete provision **[B]** on the harness before programming to vehicle.

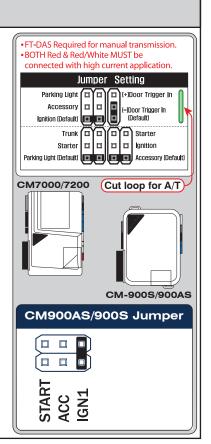

Please note that the harness has changed, jumpers have been added that allow selecting between IGN and PATS power for BLADE programming. This install type requires that the Green jumper is connected, other configuration will not work.

FTI-FDK1 - Installation and Configuration Notes

- A CUT REQUIRED
- B DO NOT CONNECT (If the vehicle is not equipped with an immobilizer, connect before programming)
- C REQUIRED CONNECTION
- D REQUIRED CONNECTION

DOORLOCK INTERFACE FORD/LINCOLN

Patent No. US 8,856,780 CA 2759622

Page 7 of 9 COM-BLADE-AL(DL)-FM3-EN Doc. No.: ##71643## 20200925

CARTRIDGE INSTALLATION

Slide cartridge into unit. Notice button under LED.

2

Ready for Module Programming Procedure.

MODULE PROGRAMMING PROCEDURE - 1 OF 2

NOTE

I To complete this procedure, both OEM keys are required.

Insert key 1 into ignition.

2

Turn key 1 to ON position.

3

LED will turn solid RED.

4

If LED turns solid BLUE, proceed with step 21.

If LED flashes BLUE, proceed with step 5.

5 (OFF)

Turn key 1 to OFF position.

6

Remove key 1.

7

Wait, LED will turn OFF. (This may take up to 30 seconds.)

8

Insert key 1 into ignition.

9

Turn key 1 to ON position.

If the LED begins to flash RED, verify the RX and TX connections between the module and the vehicle.

10

If LED turns solid BLUE for 2 seconds, proceed with step 21.

If LED turns solid RED, proceed with step 11 within 5 seconds, after LED turns OFF.

11

Turn key 1 to OFF position.

Remove key 1.

Insert key 2 into ignition.
