AL-MA6 Mazda	CX-50 PTS AT	2023	Туре 1	32-Pin	Park / Auto Switch	DKP	РКР	Green White/Blue N/A					
This install requires BLADE-AL(AL)-MA6 , firmware and the following required accessories, Weblink Hub & ACC RFID1. Flash module, and update the controller firmware. <i>Please follow the directions for RFID programming before attempting to program the BLADE module to the vehicle.</i> CAN : Type 1 CAN connections are made at the vehicle BCM using the 32-pin connector, no further connections required. Lights : Parking and auto-light connections are made through the harness 12-pin connector at the rear of the headlight switch assembly. Replace the green/white wire of the CM I/O connector with the pre-terminated green/white wire of the harness. LFCM 32-Pin Connector (removeable) : The FTI-MAP2 T-harness has been designed with a removeable 32-pin connector to facilitate an easier installation, by removing the connector bulk while running wires to the passenger kick panel. Please ensure that the 4-pin connectors are securely fastened, to avoid malfunction. ACC-RFID1 (REQUIRED) : MA6 firmware does not provide immobilizer data, an ACC-RFID1 is therefore required for remote start.													
Advisory 1: Program ACC-RFID1 before attempting to program the BLADE module to the vehicle. Advisory 2: Secure the 4-pin connectors of the removeable 32-pin connector to the adjacent RFID harness body.
